

WHITEPAPER

The Mr Potato can be swapped into a Mr Potato NTF.

Mr Potato meme token is a renounced smart contract for the people.....

MrPotatoToken.com MrPotatoNFT.com MrPotatoken.com

Executive Summary

Mr Potato meme token is a renounced smart contract for the people
Tradable through the Mr Potato token on either CEX, DEX or NFT marketplaces.

555,555,555,555,555 MrPotato NFT series ERC721

555,555,555,555,555 MrPotato tokens ERC20

Cross chain Swap 1-1 ERC721 to ERC20

- First cross chain 555,555,555,555,555 NFT smart contract
- First Liquidity Bridge smart contract to offer 1-1 conversion between Non Fungible ERC721 and Fungible ERC20 tokens.
- First investment grade NFT that is interchangeable Cross chain 1-1 with Liquidity backed Fungible MrPotato token.
- MetaPotato MetaScore, Play2Earn Game character generation
- A MetaPotato uses the Metaverse bridge after being airdropped MetaPart rewards from NFT staking to assemble and mint a MrPotatoNFT
- NFT MetaPart customisation marketplace improves MetaPoints MetaScore and Rank.
- The reflections for fungible token holders are created through the ecosystem bridge taxes with no impact on token liquidity.
- MetaPart and MrPotatoNFT WinSpin smart contract

The Mr Potato Project has a **solid business model** and careful experienced team with new creative Web3 and NFT Liquidity Solutions developed patiently pre launch and pre exchange listing.

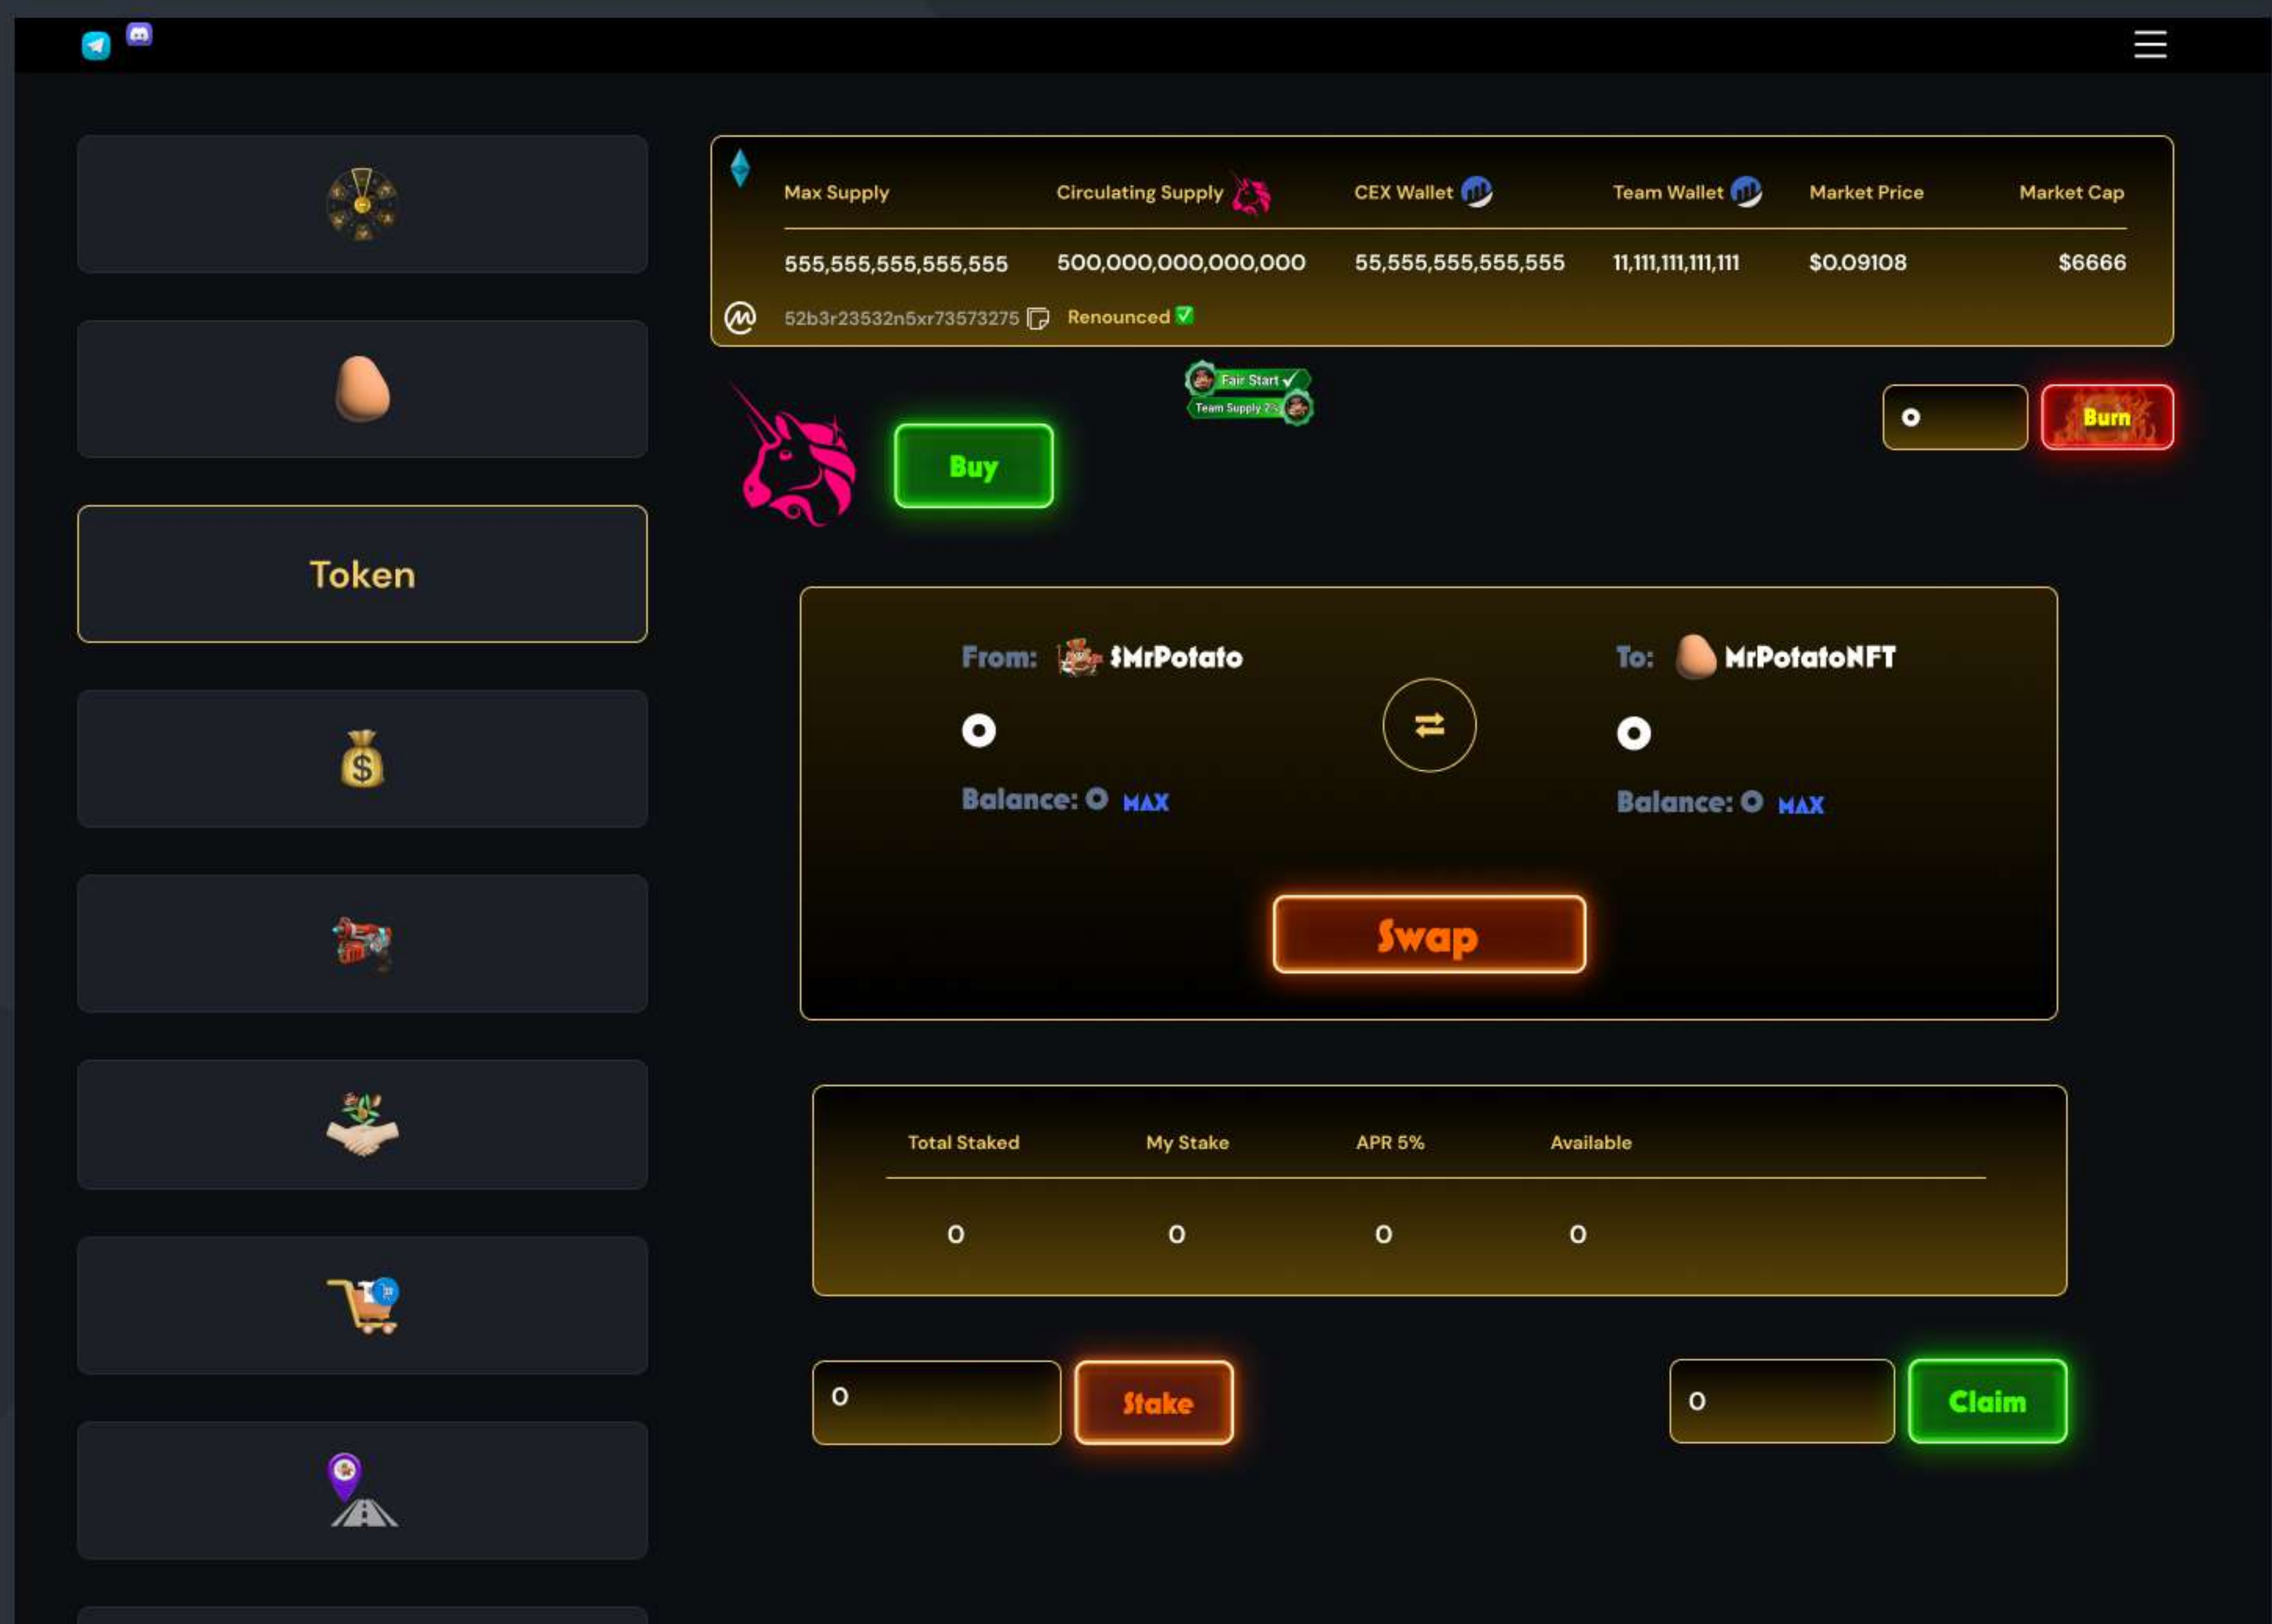

Self-funded Developed Smart contracts:

- ERC20 Staking
- ERC721 MetaPart Staking
- Liquidity Bridge (Swap ERC20 ERC721)
- ERC721 WinSpin ERC20 WinSpin
- MetaPotato Parts Marketplace

The Mr Potato eco-system is designed to unlock the potential of NFTs by creating the first multi-chain, liquidity backed 555,555,555.555,555 **population of Potato NFTS**, Trade Potato token or NFT on CEX, DEX and NFT marketplaces.

The solution includes a **Liquidity Bridge** or token swap tool which combines the ERC20 Potato tokens centralised liquidity with the ERC721 Mr Potato NFT (marketplace) liquidity to manifest an investment grade asset.

Inside the **MetaPotato GameFi Play2Earn** environment Potato Economy uses decentralised gamification to manage an ecosystem where A **Mr Potato NFT is cloned using Web3 staking**. In the **MetaPotato enviroment** the holders Mr Potato NFT ID card and the holders wallet address will be airdropped a new random **MetaPart every day**, from the existing range of eight hundred collectible and tradable Mr Potato parts, which changes the MetaRank and MetaScore of the cloned MetaPotato. Collectible or high MetaPoint ERC1155 Metaparts can be bought or sold in the MetaPotato marketplace.

Potato Token & Mr Potato NFT

The newly minted ERC721 MetaPotato has a Total MetaScore value which is created by adding together the cumulative MetaPoints values of the ERC1155 tokenized attributes for Tools, Speed, Grade and Features

Mr Potato NFT is cloned using Web3 staking. The newly minted ERC721 MetaPotato has a Total MetaScore value which is created by adding together the cumulative MetaPoints values of the ERC1155 tokenized attributes.

Highest scoring Tools, Speed, Grade, Features or decide MetaScore

- 780 Original MetaParts (ERC1155)
- New Limited edition MetaParts (ERC1155)

The MetaParts (ERC1155) can be traded or bought in the MetaParts Marketplace. This will allow users to improve their MetaPotato's MetaScore and / or personalize their Metaverse Potato for Game play , highly customised tokenised on chain MetaPotato charcters can have high long term digital asset value in metaverse Gameplay enviroment

Liquidity Bridge

The Liquidity Bridge Smart Contract manages the one-to-one conversion of Mr Potato token (ERC20) into Mr Potato NFT (ERC721) or vice versa.

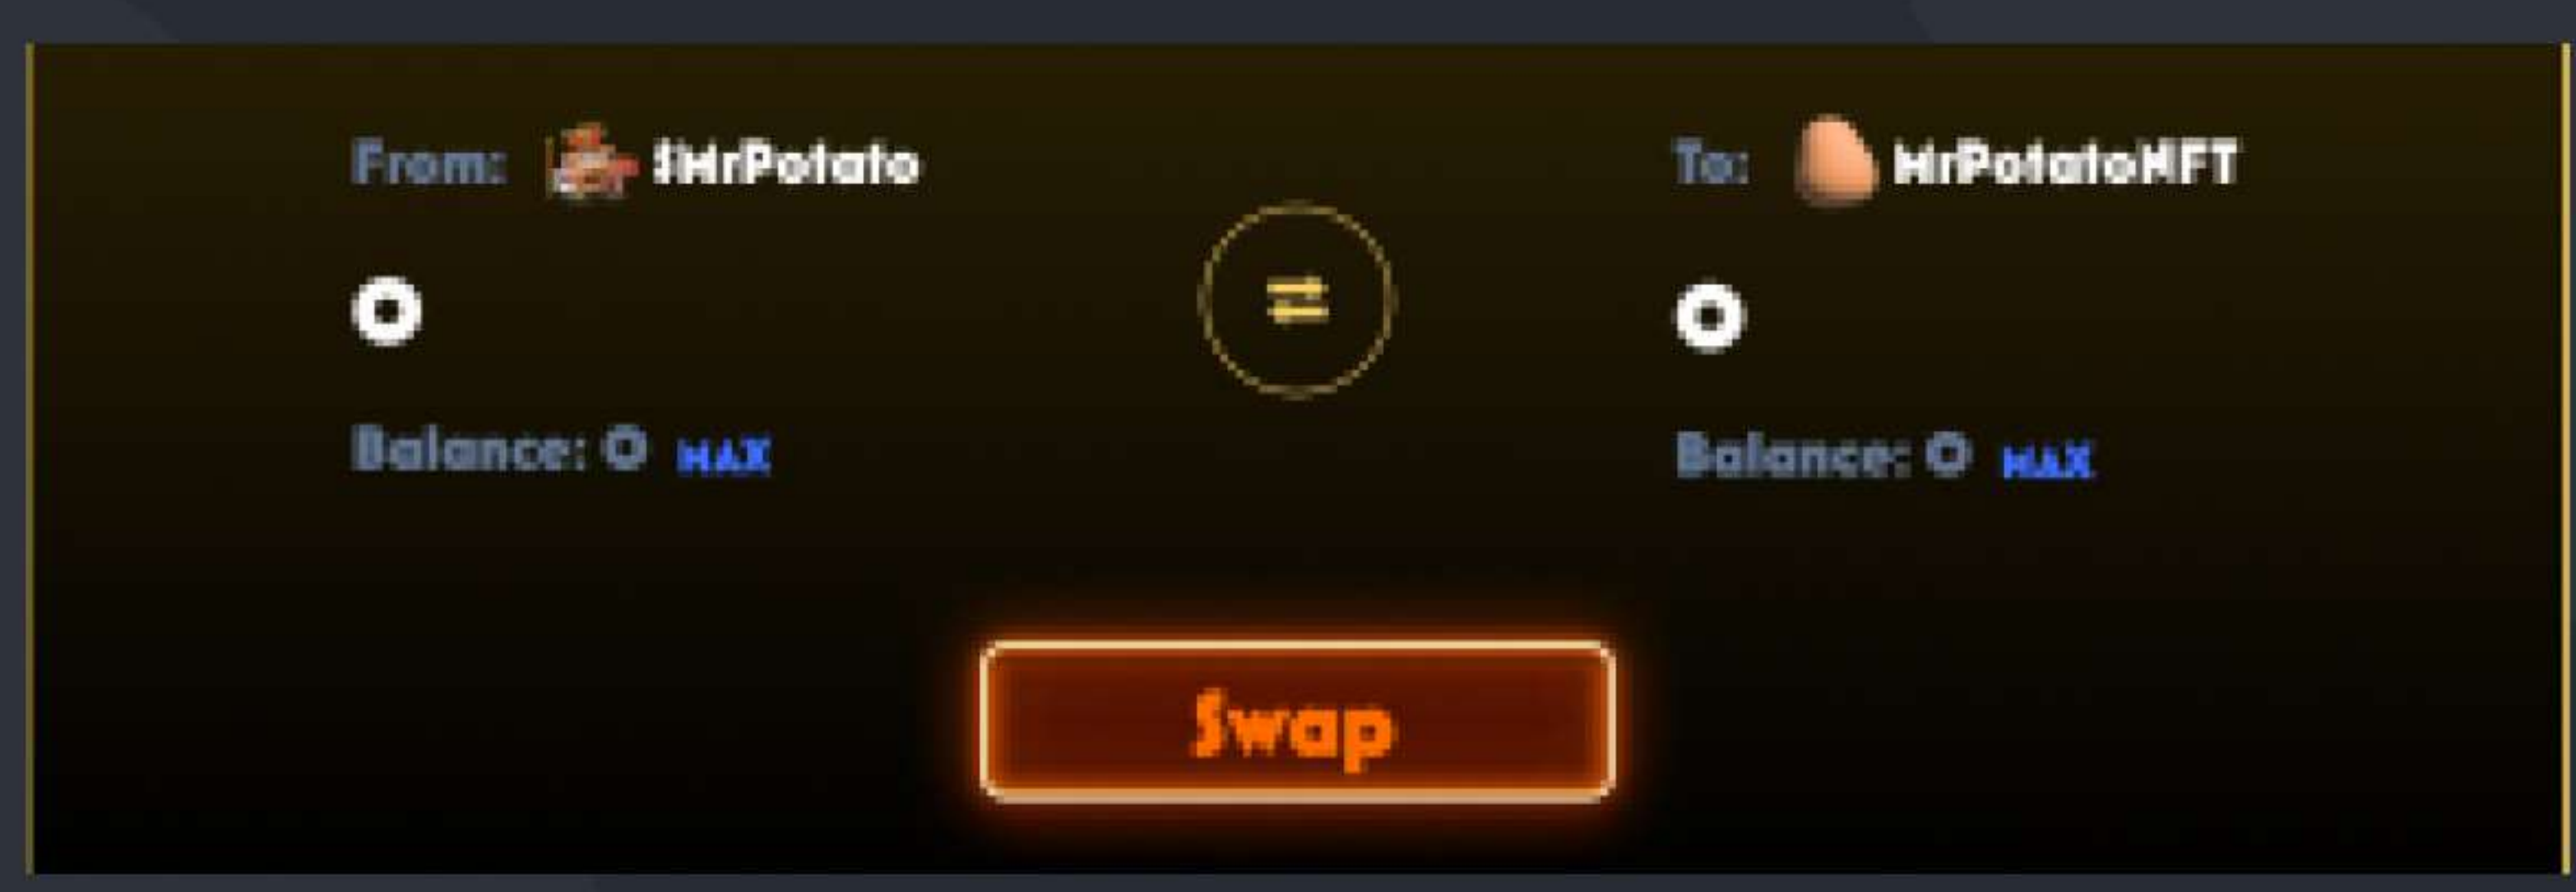

ERC20 ERC721 LIQUIDITY BRIDGE IMPACT

- ERC20 Mr Potato tokens can be traded on any CEX spot exchange.
- ERC20 Mr Potato tokens can be pooled on decentralized exchanges, DEX.
- Any amount of ERC20 Mr Potato tokens can be exchanged 1-1 into Mr Potato NFTs
- Any amount of ERC721 Mr Potato NFTs can be exchanged 1-1 into Mr Potato tokens
- Liquidity bridge is the smart contract foundation to manage the increased liquidity and trading frequency of a bridged token.
- Immediate CEX ERC20 market price liquidity for Mr Potato NFT ERC721.

USER EXPERIENCE

- Investors can trade on CEX/DEX.
- Investors can convert Mr Potato tokens into Mr Potato NFTs.
- Mr Potato NFTs can be liquidated at any time through the Liquidity Bridge on CEX/DEX.

Mr Potato tokens (ERC20) and Mr Potato NFTs (ERC721) now are both investment grade.

Mr Potato Token (ERC20)

MR POTATO TOKEN USE CASE

Mr Potato token is a community meme token for the people, which can be swapped into a Mr Potato NFT. The Bridge Smart Contract manages the one-to-one conversion of Mr Potato Token (ERC20) into Mr Potato NFT (ERC721) Game Character

Mr Potato project MetaStaking environment engine has three independent mechanisms decentralisingly managing the moving parts involved in a metaverse project ecosystem for the benefit of the community

The Mr Potato Project collects from bringing to the community both experienced CEX and DEX meme and cryptocurrency traders and liquidity managers, Metaverse gamers, rare NFT and Digital Trading Card collectors.

The Nostalgic Mr Potato is familiar worldwide and raises a smile across all generations

Create a customisable game character for the MetaPotato game using Web3 blockchain and tokenisation

FAIR LAUNCH

- 90% of token supply fair launch Uniswap pool
- 7,5% of token supply reserved for CEX listing
- 2.5% of token supply team

SMART CONTRACT DETAILS

- | | |
|--------------------|---------------------|
| • Name | Mr Potato Token |
| • Ticker | \$MrPotato |
| • Supply | 555,555,555,555,555 |
| • Blockchain | Ethereum |
| • Token standard | ERC20 |
| • Contract address | |
| • Ownership | Renounced |

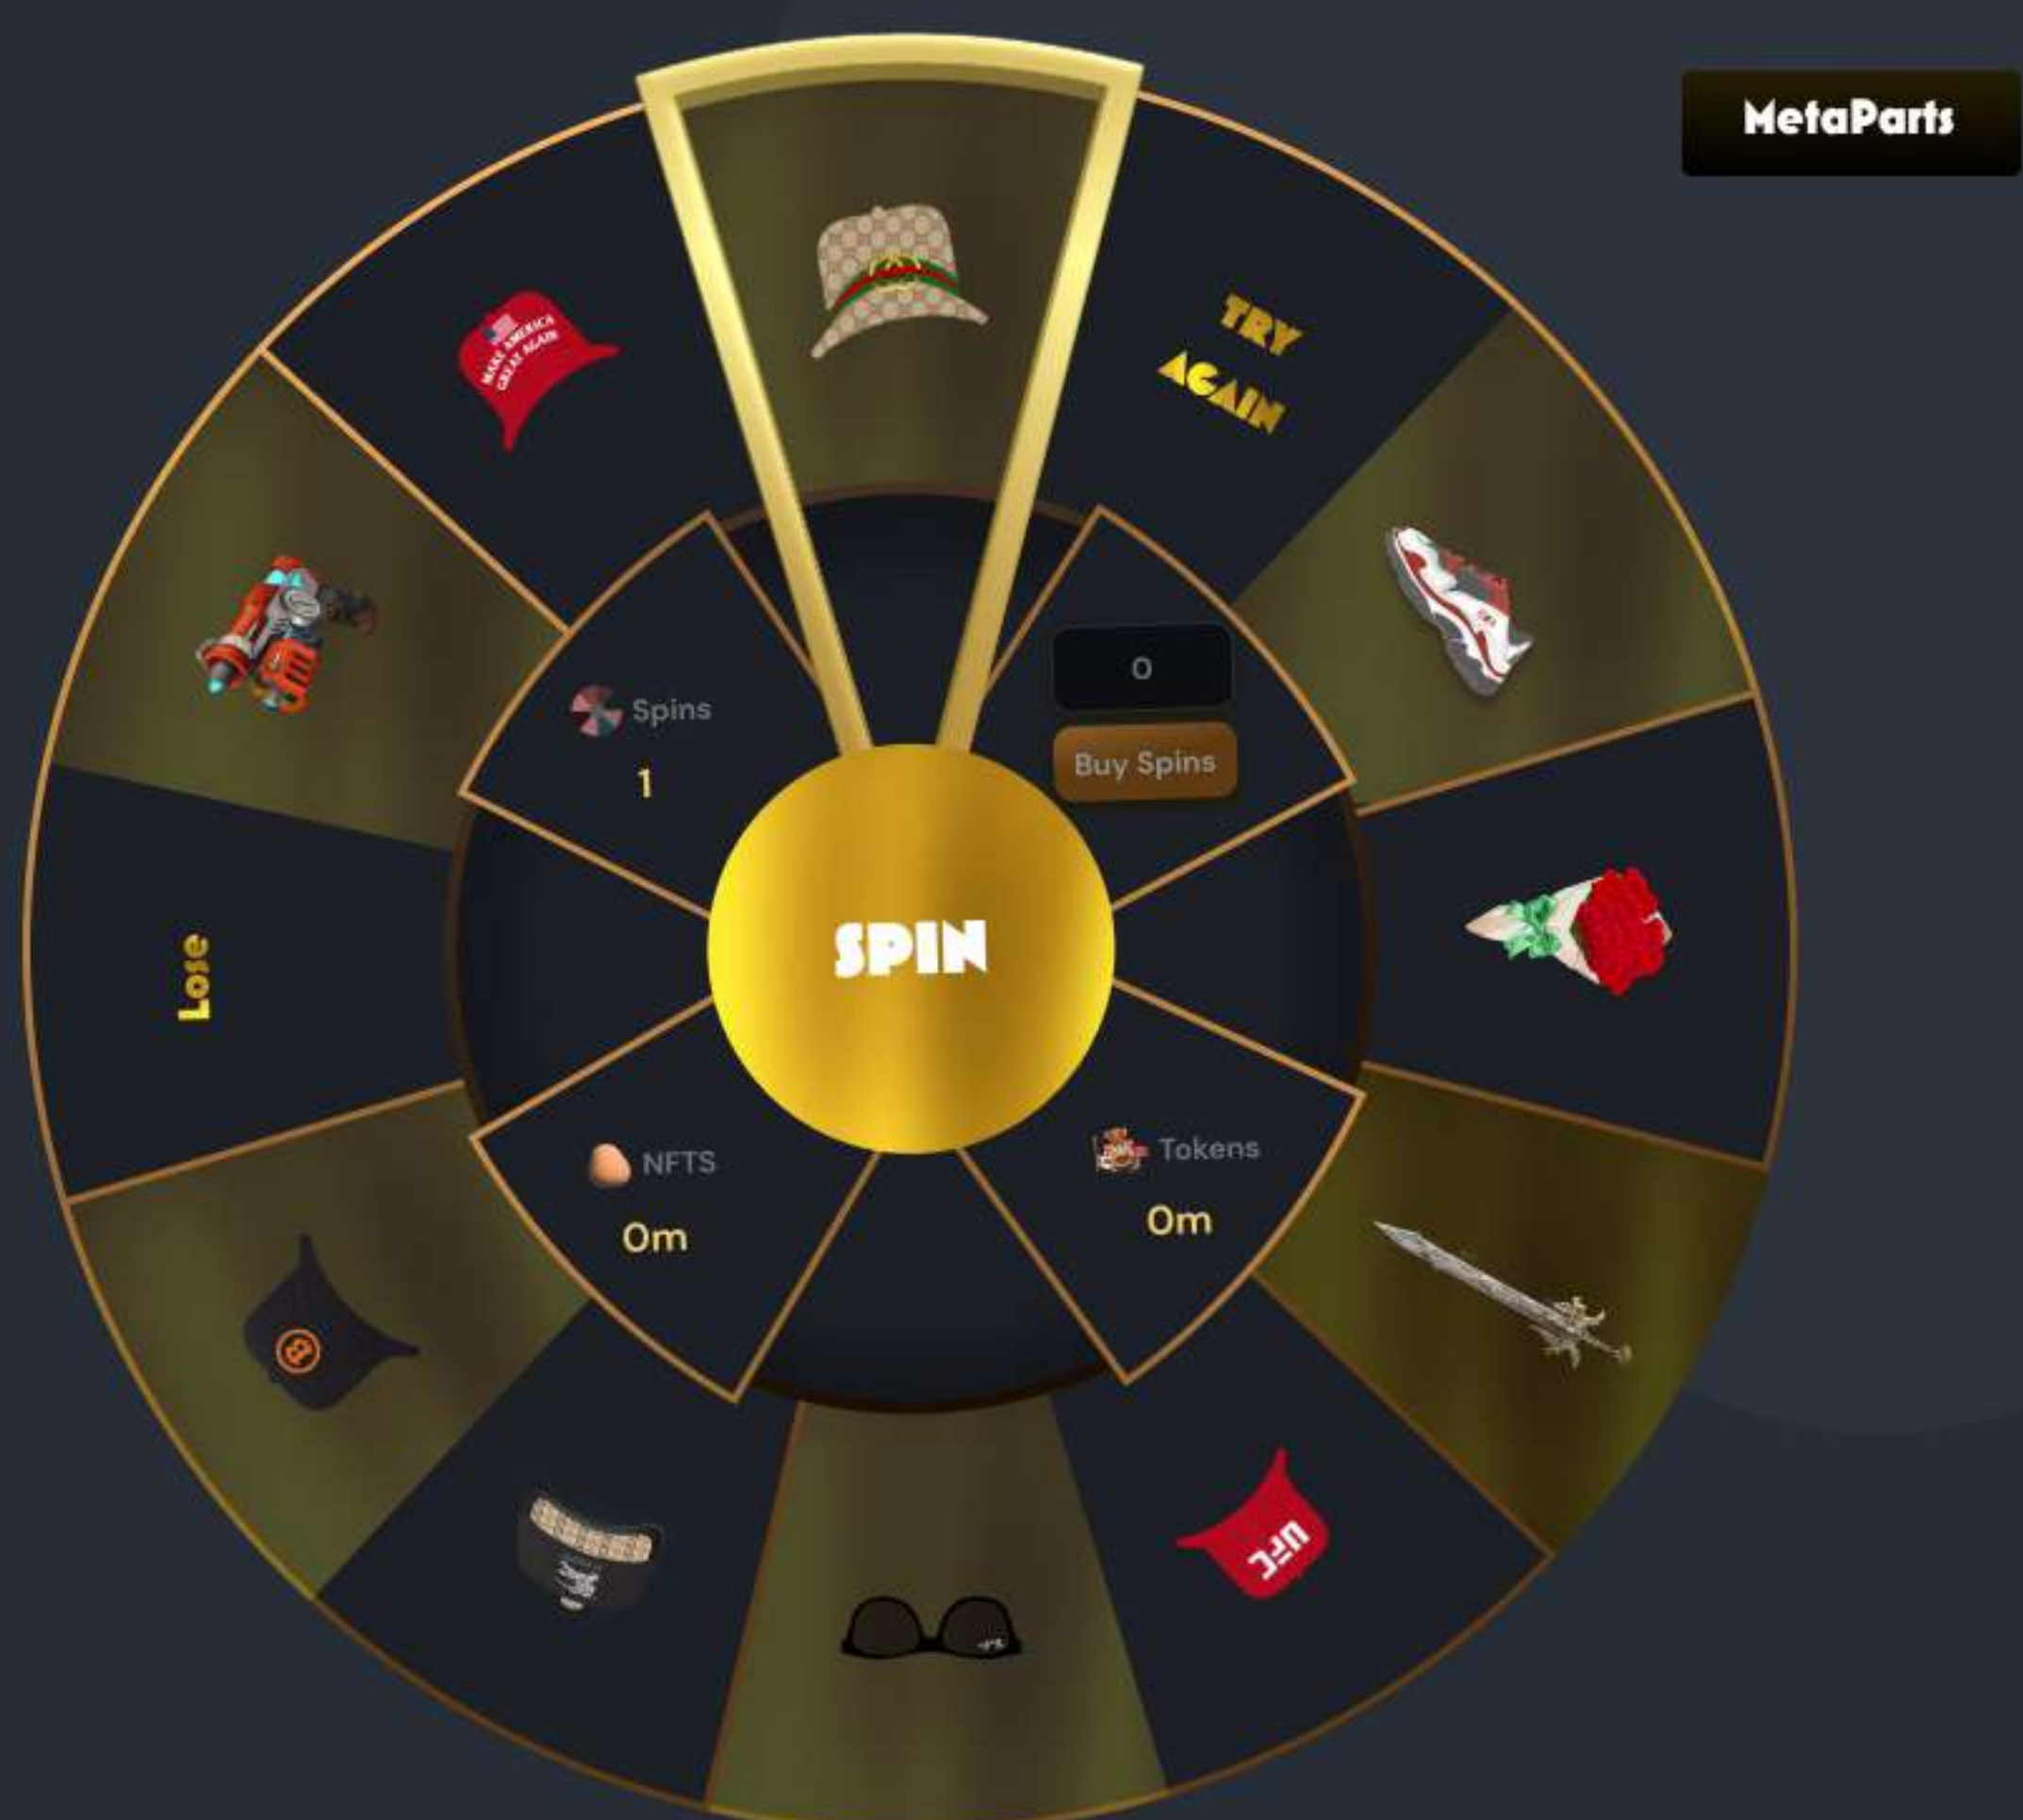

Players can for a small gas fee spin the Mint Spin and take the chance of either losing or winning more.

- Burn Airdropped MetaParts for WinSpins

Mint Spin payout potential

- Mr Potato NFTs
- Collectible and rare MetaParts ERC1155
- Or Lose and not win any tokens
- Jackpot in BUSD

Potato Trading App

Potato Trading App, Version 1.0

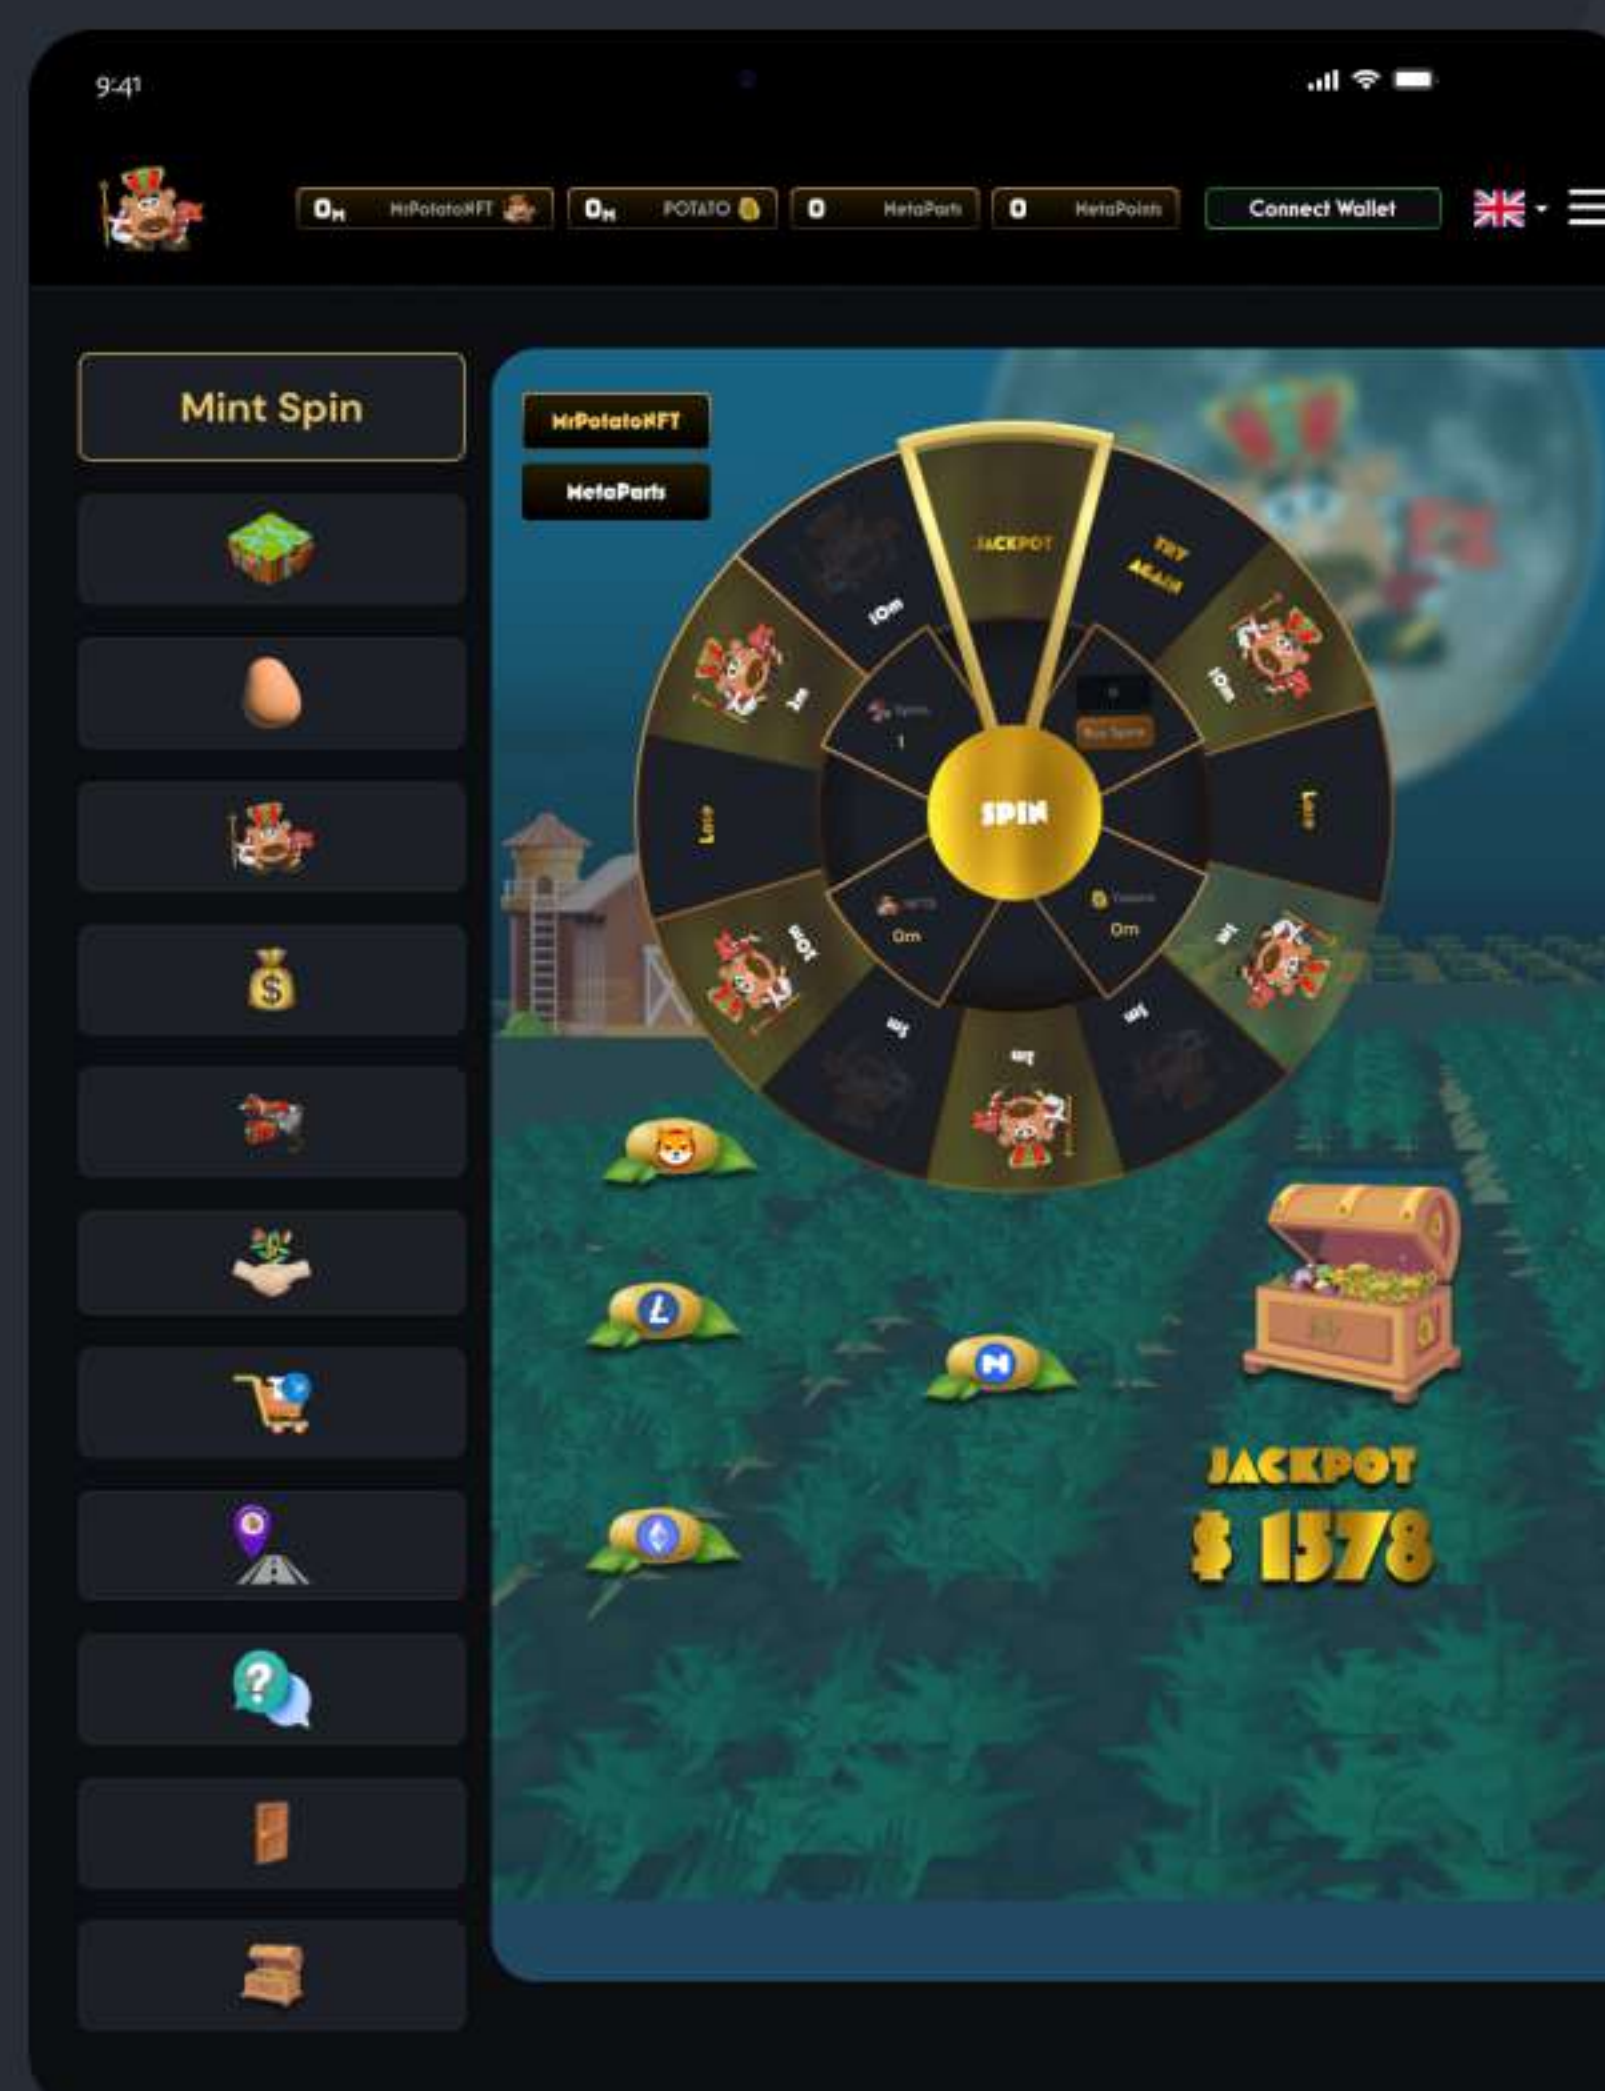

- Buy MrPotato Token (ERC20)
- Buy MrPotatoNFT (ERC721)
- Liquidity Bridge, exchange Mr Potato NFT to MrPotato token (\$Potato)
- MetaPart Spin and MintSpin

Potato Trading App, Version 2.0

Upgrade and expansion of the Potato Trading App ;

- Staking MrPotatoNFT (ERC721)
- MetaUniverse MetaPotato
- Staking Potato Token (ERC20)
- Collectible MetaPart Marketplace
- MetaPotato Play2 earn Game

All of the Potato ecosystem experience
on Android and iPhone

Q3 2022

- Develop Potato Population Metaverse concept
- Design 728 Unique Potato Population Metaverse Attributes

Q4 2022

- Design UX and NFT Liquidity Bridge contract
- Design UX and Lucky Win Spin contract
- Design UX and NFT Bridge contract
- Design Ux and Mr Potato NFT Staking contract
- Design UX and MetaPotato GameFi Play2Earn Game contract
- Design Mobile App
- Design Potato Token Staking contract

Q1 2023

- Mr Potato Token smart contract on ETH
- NFT smart contract on BSC
- Develop Liquidity Bridge smart contract
- Develop MetaPotato GameFi Play2Earn Game P2C smart contract
- Develop Lucky Win Spin smart contract
- MrPotatoNFT.com website for PC/Tablet/Mobile
- Website SEO

Q2 2023

- Launch of the Mr Potato project
- Mr Potato Token smart contract renounced
- Telegram community marketing
- Discord community marketing
- Twitter community marketing
- Mr Potato Token DEX liquidity pool
- Mr Potato Token Tier 1 CEX listing

Q3 2023

- Mr Potato Token Tier 1 CEX listing
- MetaPotato MetaParts ERC1155
- MetaPotato Marketplace launch
- NFT Bridge multi chain smart contract
- Play2 earn Game Design
- Play2 earn Game Launch

Business Model

The Mr Potato business model consists of revenue streams from Mr Potato Token DEX and CEX sales and market making, Opensea commissions, Liquidity Bridge and NFT^ Bridge reflections plus revenues from collectible additional MetaParts sales.

Initial ERC20 Potato Token Sales

Mr Potato Token sale on DEX Listing and Tier 1 CEX listings .

NFT Marketplace Commissions

The Mr Potato NFT Opensea marketplace Royalty is 1 % of the NFT sales price.

Potato Token EcoSystem Smart Contract Reflections

The Mr Potato Project implements a small automatic tax for each of the ecosystem smart contracts:

- Liquidity Bridge smart contract transaction reflection.
- NFT cross chain swap smart contract reflection.
- WinSpin smart contract reflection.
- Play2earn MetaPotato Game smart contract reflection.

MetaParts

MetaPotato Metaparts token supply quantity and pricing are finalised by community vote.

Proceeds collected from these collectible Mr Potato MetaPart tokens is to the benefit of the Mr Potato Treasury.

Token Management

An essential component of the Mr Potato eco-system is token management across multiple platforms and against multiple cryptocurrencies.

Fair launch strategy

- 90 % of the Potato Tokens will be pooled on Uniswap.

DEX strategy

- Mr Potato Tokens will be pooled on DEX Uniswap with WETH
- The DEX pool will allow any potential investor to quickly participate in the Potato economy without passing KYC.
- The DEX pool will be funded with substantial and sufficient Liquidity to provide a secure floor price.

CEX strategy

- MrPotato Tokens (\$Potato) will be listed on Tier1 CEX paired against Ethereum
- MrPotato Tokens (\$Potato) will be supported with sufficient funds to create large CEX order book liquidity

Opensea strategy

- Mr Potato NFTS listed for sale on NFT marketplaces such as Opensea Royalties reflect to Mr Potato token holders.

Arbitrage

- Listing the ERC20 MrPotato Token (\$Potato) in different cryptocurrency liquidity pools will create arbitrage opportunities driven by the price movements between these cryptos, increasing market volumes
- Arbitrage opportunities will also be created by having Mr Potato NFT listed on many different NFT marketplace.
